

## Drone /UAV/ /Unmanned Air Vehicle Advanced Flight Operations Training

Expanding on our Standard Flight Operations Training, this course trains the worker how to use their flight knowledge to go beyond simple inspections. Setting a First Man Up cable system has become a difficult and time consuming safety risk for many workers and with this new technology the job becomes much easier and quicker.

Classroom and field training – 16 Hours

Topic covered include:

- Advanced Flight Time
- Exposure to advanced difficult scenarios and conditions
- Advanced Mechanical knowledge
- Component replacement
- GPS way point and flight systems programs
- Rope rigging & hoisting using drone/UAV technology
- Setting safety lines
- Wind issues
- High elevation issues
- Operation training
- Drop systems
- Software updates and programming
